NOTIFICATION OF TRANSMITTAL OF INTERNATIONAL PRELIMINARY **EXAMINATION REPORT**

(PCT Rule 71.1)

Date of Mailing

12 JAN 2000

(day/month/year) Applicant's or agent's file reference IMPORTANT NOTIFICATION F-3614-PC Priority Date (day/month/year) International filing date (day/month/year) International application No. 31 JULY 1997 31 JULY 1998 PCT/US98/16040 Applicant SCIENTIFIC-ATLANTA, INC.

- The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the 1. international preliminary examination report and its annexes, if any, established on the international application
- A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication 2. to all the elected Offices.
- Where required by any of the elected Offices, the International Bureau will prepare an English translation of 3. the report (but not of any annexes) and will transmit such translation to those Offices

REMINDER

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices)(Article 39(1))(see also the reminder sent by the International Bureau with Form PCT/IB/301)

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

Industrial Applicability (IA) Claims Claims	STATEMENT			
Industrial Applicability (IA) Claims Claims	Novelty (N)	Claims	NONE	Y
Industrial Applicability (IA) Claims Claims I-12 NONE CITATIONS AND EXPLANATIONS Claims 1-7 lack novelty under PCT Article 33(2) as being anticipated by Rohatgi (EP 0752 786). Rohatgi teaches sending message, the digitally signed hash of the message and a certificate from the headend to the set top which then recreates the har and compares to determine both source authenticity and data integrity. Claims 8-12 lack an inventive step under PCT Article 33(3) as being obvious over Rohatgi (786) in view of Coutrot et al Rohatgi does not specifically teach the use of the control word. Coutrot teaches (p. 464, top of right column)the ubiquity or control words in conditional access satellite systems, that they should be transmitted in encrypted form (p. 464 bottom of right column) and their use as input to the Hash. In light of this teaching it would have been obvious to implement Rohatgi with the additional requirement of using the control word. Claim 1-12 lack an inventive step under PCT Article 33(3) as being obvious over Moore (527). Moore teaches (at the locations cited) an analogous system for a software reuse library. The only difference is that the context of Moore is not satellite or cable tv. It is well established that teachings regarding "software" encompass all forms of digital data. In this digital age, when television transmissions are digital, the application of Moore's scheme to a TV system using "headends" and "set-tops" is obvious.
